

Welcome to NACHI – The German subsidiary of the Japanese technology company NACHI-FUJIKOSHI has been around for over 50 years. More than 80 engineers, technicians, tradesmen, and sales personnel at NACHI Europe GmbH serve potential and existing clients in Germany and in practically all European countries. The NACHI product range includes metal-cutting tools, roller bearings, hydraulic equipment & systems, industrial robots, and machine tools.

We are currently looking for a

Robotics Application & Technical Support Engineer (m/f/d)

Location: Baden-Württemberg

Job Type: Full-time

Start: as soon as possible

Your mission

Provide technical support for customers and partners, including programming assistance, electrical and mechanical troubleshooting, and repair and commissioning.
Support national and international projects from installation to ramp-up.
Perform maintenance, installation and servicing activities in Germany and occasionally across Europe.
Create and run offline simulations to support project planning and optimisation.
Conduct internal and external training sessions and prepare training materials and quick-start guides.
Execute equipment testing and technical experiments to validate performance and applications.
Take responsibility for the technical design, setup and maintenance of the Technical Centre.
Clarify technical topics and drive product improvements with our Japanese colleagues and the Product Manager, sharing findings with subsidiaries.
Join customer, prospect and distributor visits across Europe with the sales team.
Build and maintain a strong service and support network.
Support and participate in trade fairs and exhibitions in Germany and abroad.

Your profile

Completed education in mechatronics, electrical engineering, automation engineering or a related field (technician, or any degree).
Solid programming skills in robot controls and PLCs.
Installation and project experience in setting up and commissioning robotics systems
Robotic simulation experience is advantageous.
Strong electrical, mechanical and pneumatic knowledge
Good command of German and English (spoken and written).
Willingness to travel within Germany and occasionally across Europe, including overnight stays.
Beginners welcome!

We offer

The opportunity to represent a Japanese premium robotics manufacturer in the DACH market
A secure, permanent full-time position in a strong and supportive team
High level of autonomy, creative freedom, and room to grow
A dynamic role with new challenges every day
13 monthly salaries + holiday pay + supplementary health insurance
A company car, also for private use
30 days of annual leave
